WHAT WE DO

Full circle web development

CASE STUDY #1

Goal: Create a platform for UK footage agency to make BTB-sales of video clips

Solution created:

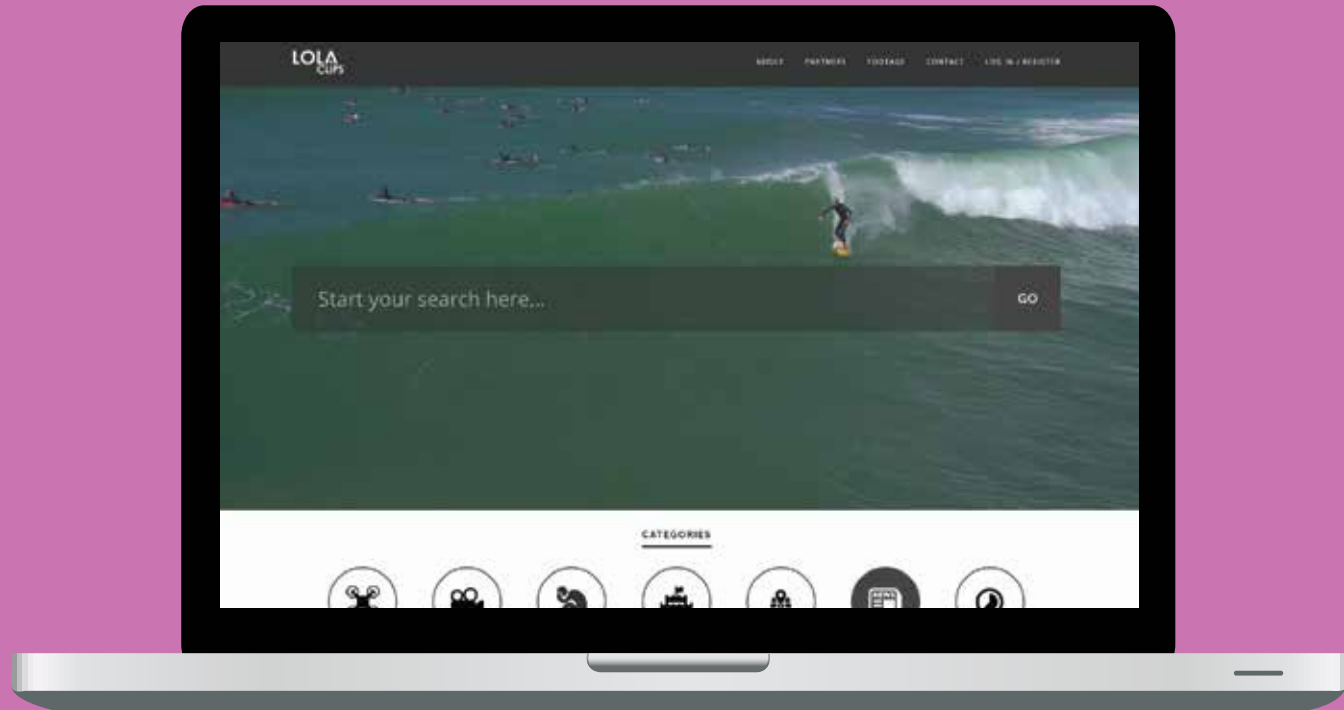

- Web directory with video clips organized in categories and tags
- Powerful keyword search allows customers easily find the clip
- Store video on Amazon S3 server for fast loading
- Mass video import from xls
- Automatic 3-sec video preview generation
- CMS functionality for all static pages
- Responsive design for easy access on mobile devices

Technologies:

PHP (Symfony Framework), HTML, CSS, Javascript, JQuery, ffmpeg, Amazon S3, Amazon EC2

Project: Lolaclips

Live link: <http://lolaclips.com/>

"The site is really slick and everyone is very happy with it. Great agency, with a talented team behind them. Will be working exclusively with Zimalab moving forward for all my Symfony 2 projects and would have no hesitation in recommending them".

Patrick from UK

CASE STUDY #2

Goal: Create membership website for the Academy of Australian and New Zealand Prosthodontists community

Work done:

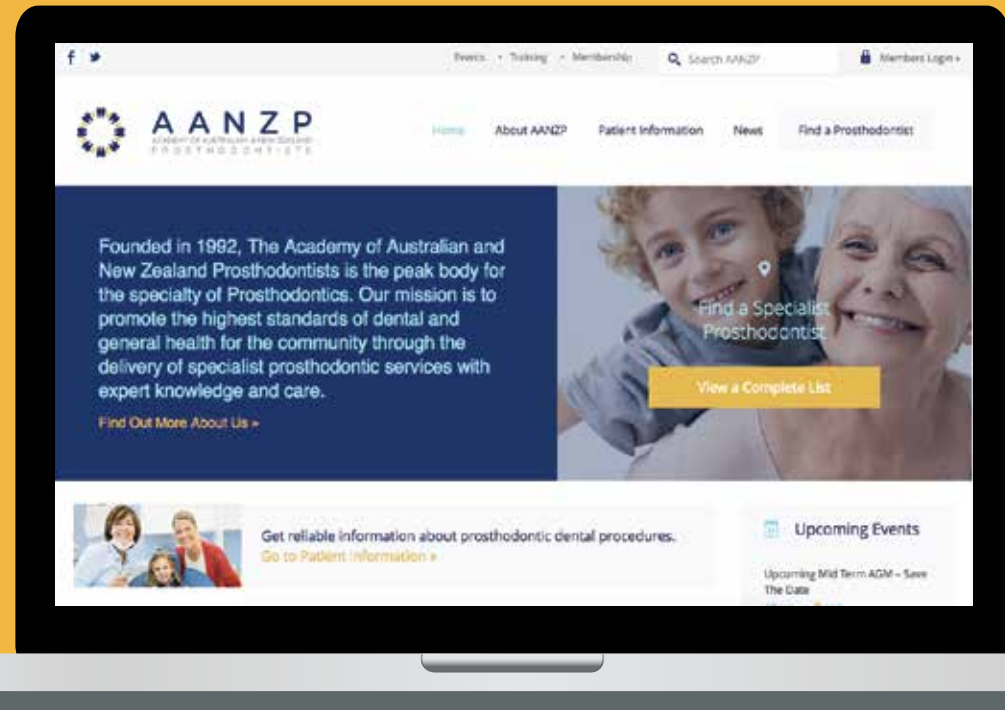

- Responsive directory with profiles of all community members
- Interactive map and search among members
- Paid membership subscriptions via Stripe
- Events management and tickets sale functionality
- Blog with community news
- Ongoing support and maintainance

Technologies:

PHP (Wordpress CMS), HTML, CSS, Javascript, Jquery, AJAX, Stripe API, Google maps API

Project: AANZP

Live link: <https://www.aanzp.com.au/>

“Zimalab are very professional and responsive to work with. They produce good quality work. I found them a pleasure to work with and will work with them again”.

Natalie from Australia

GEO QUIZ

Drink a cup of coffee when you are in Siberia!

Zimalab office

Russia, Siberia, Novosibirsk

Our clients

We have great customers in USA, Canada, Germany, France, UK, Netherlands, Romania and Australia

Zimalab office

We are located in the scientific center of **Siberia, Russia** called Academgorodok and that's why we have many talented developers in our team

HOW WE WORK

We work a lot and we love our work

Approach

We use combination of agile and fix budget approach.

- Split project into phases
- Estimate each phase separately
- Work phase by phase
- If we don't fit the estimate find alternative way or ease the functionality
- Update project estimates after each phases
- Each phase usually from 40 till 120 work hours

Effective management

Project manager with fluent English handles all the communication. Developer focused on work. Weekly or daily updates. Flexible availability adjusted for the customer. Customer business goals orientation.
